

How to Search, Read, and Understand Research Papers ?

Alka Bhushan

Tools

- Google Scholar
 - <https://scholar.google.com/>
- Semantic Scholar
 - <https://www.semanticscholar.org/>
- Perplexity
 - <https://www.perplexity.ai/>
- Consensus app
 - <https://consensus.app/>

Database

- ScienceDirect
 - [sciencedirect.com](https://www.sciencedirect.com)
- ACM digital
 - <https://dl.acm.org/>
- IEEE
 - <https://www.ieee.org/>
- NATURE
 - <https://www.nature.com/>
- ARXIV
 - <https://arxiv.org>

Search Keywords

- List of Keywords
- Operators: 'AND', 'OR'
 - Example: performance modeling **and** Machine learning
 - Example: performance modeling **or** autotuning
- Synonym words
- Survey Paper
 - ACM, IEEE

Research Paper

- Abstract
 - Relevance and Key Contribution

Research Paper

- Abstract
 - Relevance and Key Contribution
- Introduction
 - Key papers
 - Research gap and contribution detail

Research Paper

- Abstract
 - Relevance and Key Contribution
- Introduction
 - Key papers
 - Research gap and contribution detail
- Related Work
 - Research work in related areas

Research Paper

- Abstract
 - Relevance and Key Contribution
- Introduction
 - Key papers
 - Research gap and contribution detail
- Related Work
 - Research work in related areas
- Problem definition

Research Paper

- Abstract
 - Relevance and Key Contribution
- Introduction
 - Key papers
 - Research gap and contribution detail
- Related Work
 - Research work in related areas
- Problem definition
- Methodology

Research Paper

- Abstract
 - Relevance and Key Contribution
- Introduction
 - Key papers
 - Research gap and contribution detail
- Related Work
 - Research work in related areas
- Problem definition
- Methodology
- Results
 - Dataset, Resource Requirement, research questions, runtime, accuracy, base models/methods for comparison

Research Paper

- Abstract
 - Relevance and Key Contribution
- Introduction
 - Key papers
 - Research gap and contribution detail
- Related Work
 - Research work in related areas
- Problem definition
- Methodology
- Results
 - Dataset, Resource Requirement, research questions, runtime, accuracy, base models/methods for comparison
- Conclusion
 - Future work, unexplored problem
